### #AskBUILDUP: Smart buildings for a greener Europe: emerging policy and practice

On 14 February, Concerted Action on the Energy Performance of Buildings Directive (CA-EPBD) organises a panel discussion on how smart buildings can improve the energy efficiency of Europe's building stock. The workshop, held in Valetta, Malta, will be streamed live on BUILD UP. You are invited to hand in your questions by sending an email to [pr@buildup.eu](mailto:pr@buildup.eu) or on Twitter using the hashtag [#AskBUILDUP](#). [Read more](#)

### European legislation and the construction sector: a fitness check

This spring, the European Commission's Regulatory Fitness and Performance Programme (REFIT) will conduct a fitness check of Europe's construction sector. A new study already explains how European internal market and energy efficiency legislation affect competitiveness and sustainability in the construction sector. [Read more](#)
